🌐 My portafolio

Academics Dates

Unidades Tecnolgicas de Santander

Technology in Computer Systems Development | January 2022
GPA : 4.01/5

Technical Skills

LANGUAGES
Spanish (Native)
English (B1)

OPERATING SYSTEMS
GNU/Linux(Centos 7, Arch)
Windows

DATABASES
SQL: MySql
NoSQL:MongoDB

PROGRAMMING LANGUAGES
JavaScript, TypeScript, Java, PHP.

BACKEND
NodeJS(ExpressJS), Laravel

FRONTEND
React.js, Tailwind CSS, Astro.

OTHER TECHNOLOGIES
Docker, AWS, Git, GitHub, Postman, Photoshop.

Proyectos

Throughout my career as a programmer, I've had the opportunity to apply my skills by collaborating on various programming projects alongside my brother, who is a systems engineer with extensive experience.

Payroll System with PHP 2022
I collaborated on the backend development of a company's payroll system using PHP, while my brother handled the frontend. This experience strengthened my technical skills and demonstrated my ability to work in teams and effectively solve problems.

I've also worked on projects using modern technologies such as React, Node.js with Express, etc., expanding my programming experience. Some examples include:

- **Schedule Automation (React.js with TypeScript, Laravel) 2024**
- **Ecommerce platform with React in 2024.**
- **REST APIs with Node.js (Express and TypeScript) in 2023.**
- **Task management page with React and Tailwind CSS in 2023.**

Soft skills

Leadership	Good communication
Good manners	Teamwork
Critical thinking	Openness to learning new things
Empathy	Organized
